

ACCOUNTING MANUFACTURING NOTES IN GRADE 12 Manual

accounting manufacturing notes in grade 12 are essential for students pursuing their studies in business studies or accounting. Manufacturing accounting is a specialized branch of accounting that focuses on the recording, analysis, and interpretation of financial data related to manufacturing activities. It helps students understand how costs are accumulated, allocated, and reported in manufacturing enterprises, which is crucial for effective financial management and decision-making. In Grade 12, understanding manufacturing notes enhances students' grasp of core concepts such as cost classification, inventory valuation, and financial statements preparation specific to manufacturing firms.

Understanding Manufacturing Accounting

Manufacturing accounting differs from service or trading business accounting because it involves the management of raw materials, work-in-progress, and finished goods. It aims to determine the cost of goods manufactured (COGM), cost of goods sold (COGS), and the valuation of inventory at different stages of production.

Key Concepts in Manufacturing Accounting

- **Raw Materials:** The basic materials used in the production process.
- **Work-in-Progress (WIP):** Goods that are in the process of being manufactured but are not yet complete.
- **Finished Goods:** Completed products ready for sale.
- **Direct Costs:** Costs directly attributable to production, such as raw materials and direct labor.
- **Indirect Costs (Overheads):** Costs not directly traceable to a specific product, like factory rent and utilities.

Cost Classifications in Manufacturing

Understanding how costs are classified is fundamental for accurate manufacturing accounting.

Types of Costs

- **Prime Costs:** The sum of direct materials and direct labor.

- **Manufacturing Overheads:** Indirect production costs such as factory expenses, depreciation, and maintenance.
- **Total Manufacturing Costs:** Prime costs plus manufacturing overheads.
- **Cost of Goods Manufactured (COGM):** The total cost of producing finished goods during a specific period.

Recording Manufacturing Transactions

Accurate recording of manufacturing transactions is vital for generating reliable financial statements. Key journal entries include:

Raw Materials Purchase

- Debit: Raw Materials Inventory
- Credit: Accounts Payable or Cash

Raw Materials Used in Production

- Debit: Work-in-Progress Inventory
- Credit: Raw Materials Inventory

Direct Labor Costs

- Debit: Work-in-Progress Inventory
- Credit: Wages Payable or Cash

Manufacturing Overheads Accumulation

- Debit: Manufacturing Overheads
- Credit: Accounts Payable or Cash

Applying Overheads to WIP

- Debit: Work-in-Progress Inventory
- Credit: Manufacturing Overheads

Completion of Goods

- Debit: Finished Goods Inventory
- Credit: Work-in-Progress Inventory

Calculating Cost of Goods Manufactured (COGM)

The COGM is a crucial figure in manufacturing accounting, representing the total production cost of goods completed during a period. The formula to compute COGM is:

$$\text{COGM} = \text{Opening WIP Inventory} + \text{Total Manufacturing Costs} - \text{Closing WIP Inventory}$$

Where:

- Opening WIP Inventory is the value of WIP at the beginning of the period.
- Total Manufacturing Costs include direct materials used, direct labor, and manufacturing overheads.
- Closing WIP Inventory is the value of WIP remaining at the end of the period.

Valuation of Inventory

Proper valuation of inventory is essential to determine accurate profit figures and balance sheet values. The main methods used include:

1. FIFO (First-In, First-Out)

- Assumes the oldest inventory is sold first.
- Values inventory at the most recent costs.

2. LIFO (Last-In, First-Out)

- Assumes the newest inventory is sold first.
- Values inventory at older costs.

3. Weighted Average Method

- Calculates an average cost per unit based on total cost and total units.

4. Specific Identification

- Tracks the actual cost of specific items sold and remaining in inventory.

Preparing Financial Statements for Manufacturing Business

Manufacturing firms prepare specific financial statements to reflect their unique operations.

1. Manufacturing Account

- Summarizes the costs incurred during production.
- Includes raw materials, direct labor, overheads, and WIP.

2. Cost of Goods Sold (COGS) Statement

- Calculates the cost of goods sold during the period.
- Uses inventory data and COGM.

3. Income Statement

- Reflects revenue, COGS, gross profit, operating expenses, and net profit.
- Adjusted to include manufacturing-specific accounts.

4. Balance Sheet

- Shows assets including raw materials, WIP, finished goods, and plant equipment.
- Liabilities and equity also include manufacturing-related expenses.
